Syncsite Announces Partnership with FSM Provider AgileFIELD

Syncsite, a leading distributor of Infor CRM customer relationship management software is pleased to announce a strategic partnership with AgileFIELD.

St. Petersburg, FL – November 8, 2017 – Syncsite, a premier provider of Infor CRM customer relationship management software, announced last month that it was formally committing to building the company's future around the success of the rapidly growing field service management technology space. Today, they further demonstrated their focus on serving their clients with the announcement of a strategic partnership with industry leading field service management provider- AgileFIELD

In a recent interview, Jeffrey Gregorec, Executive Vice President of Sales and Strategic Alliances at AgileFIELD made the comment, "I could not be more pleased announcing our partnership with Syncsite. Both our companies share an entrepreneurial spirit and customer first ideals. That, combined with the strength in the economy and rapid growth in our industry, will create tremendous opportunity for both organizations."

The timing of this release bodes well for both organizations as the field service industry is experiencing tremendous growth. According to Statistics MRC, the Global Workforce Management market is expected to reach \$9.01 billion by 2022, growing at a CAGR of 11.4 percent. Cloud-based solutions are driving much of that growth.

On the prospect of the partnership, Nick Kyriazis, Owner and Partner, had this to say, "With FSM being one of the largest growth markets in business software, we are so excited to partner with AgileFIELD. This partnership adds a value proposition to our current and future clients that we have been missing."

Syncsite's unique position as top CRM provider in tandem with AgileFIELD's rapidly integrable FSM solution means that the partnership has the potential for capturing the growth across the entire mid-market segment. An experienced implementation team paired with the AgileFIELD's RapidStart technology makes ROI quickly realized for solution seekers.
